# Since 1873

Fondata a Treviso nel 1873, la Ceramica Appiani è sempre stata presente con i suoi prodotti sul mercato nazionale ed internazionale.

Dalla produzione di fregi, coppi e mattoni, per cui ricevette molteplici riconoscimenti in Italia e all'estero, si passa, nei primi anni del 1900, a quella di piastrelle pressate con polvere d'argilla e si realizzano nuovi sistemi per la lavorazione e la cottura dei materiali. Nel 1910 il fondatore Graziano Appiani dà il via alla produzione delle prime mattonelle ceramich colorate e costruisce il "Paradiso dell'Eden" per la vita e il benessere dei propri maestri, che, con case, ristorante, cinema e teatro, primo esempio di imprenditoria illuminata.

Ceramica Appiani has actively promoted its products on the Italian and international markets since it was first founded in Treviso in 1873.

After initially focusing on the production of friezes, pan tiles and bricks, widely acknowledged for their high standards of quality in Italy and abroad, it turned to the production of pressed powdered clay tiles at the turn of the 20th century and created new systems for processing and firing materials. Its founder Graziano Appiani started production of the first coloured ceramic tiles in 1910 and built "Eden", a residential complex for workers that included a restaurant, cinema and theatre: the first example of a forward-thinking style of business.

Fondée à Trévise en 1873, Ceramica Appiani a toujours été présente sur le marché italien comme sur les marchés internationaux.

De la fabrication de frises, de tuiles rondes et de briques, pour lesquelles elle a reçu de nombreux prix en Italie comme à l'étranger, Ceramica Appiani passe, au début du XXe siècle, à la production de carreaux pressés comprenant des poudres d'argile, et adapte sa production à de nouveaux systèmes d'usinage et de cuisson. En 1910, Graziano Appiani, fondateur de Ceramica Appiani, lance la production des premiers carreaux céramiques colorés, et construit "Eden", un village créé à l'intérieur de ses usines, comportant des habitations, un restaurant, un cinéma et une salle de théâtre, et qui constitue, pour l'époque, un exemple éclairé.

Das Unternehmen Ceramica Appiani wurde im Jahr 1873 in Treviso gegründet und ist seither stets mit seinen Produkten auf den inländischen und ausländischen Märkten präsent. Zunächst stellte Appiani Friese, Dachziegel und Ziegelsteine her, für die das Unternehmen zahlreiche Auszeichnungen in Italien und im Ausland erhält. Anfang des 20. Jahrhunderts beginnt dann die Entwicklung von gepressten Fliesen aus Tonpulver und es werden Systeme für die Verarbeitung und den Brand der Fliesen entwickelt. Im Jahr 1910 ruft der Gründer Graziano Appiani die Produktion der ersten farbigen Keramikfliesen auf und baut in Treviso das „Villaggio Eden“, ein richtiges Dorf für seine Arbeiter mit Wohnhäusern, Restaurants, Kino und Theater, das erste Beispiel aufgeklärtem Unternehmertum in dieser Zeit.

Cerámica Appiani, fundada en Treviso en 1873, ha estado siempre presente con sus productos en los mercados nacional e internacional. De la fabricación de cornisas, tinajas y ladrillos, por los que recibe múltiples reconocimientos en Italia y en extranjero, se pasa, en los primeros años de siglo XX a la de baldosas prensadas con polvo de arcilla. Se realizan nuevas técnicas para la elaboración y la cocción de los materiales. En 1910, el fundador Graziano Appiani pone en marcha la producción de las primeras baldosas cerámicas coloreadas y construye el "aldea Edén" para los trabajadores, con casas, restaurantes, cine y teatro, primera muestra de empresariado avanzado.

Основанная в Тревизо в 1873, Ceramica Appiani всегда присутствовала со своими продуктами на национальном и международном рынке. Благодаря производству украшений, черепицы и кирпичей, Ceramica Appiani получила многочисленные признания в Италии и за границей, в начале двадцатого века

Appiani陶瓷公司(Ceramica Appiani)于1873年在特雷维索(Treviso)市创立，其产品一直畅销国内和国际市场。20世纪初，公司从曾在意大利和国外获得许多奖项的边饰、瓦、砖的生产，转到以粘土粉压制瓷砖的生产，并制造了材料加工和烧制系统。1910年，创始人格拉齐亚诺·阿皮亚尼(Graziano Appiani)开始生产首批彩色瓷砖，为自己的全体员工建筑了一

# Tradition

Durante il ventennio fascista le commesse sono relative alle pavimentazioni di caserme, hangar, ospedali e stazioni. Successivamente agli eventi bellici inizia la produzione del famoso "gres rosso" che ha contraddistinto l'azienda nel periodo della ricostruzione e del boom economico. Nel 1960 la famiglia Appiani inizia una politica di rinnovamento e sviluppa collaborazioni con progettisti e designer come Giò Ponti e Pompeo Pianezzola. Nel decennio seguente viene costruito un innovativo impianto per la produzione di gres smaltato con l'esclusiva tecnologia della "monopressocottura". Negli anni '90 la famiglia Bardelli, affermato marchio del settore, rileva l'azienda e, recuperandone le antiche tradizioni, sviluppa la produzione del mosaico ceramico. Nel 2000 viene realizzato il totale rinnovamento degli impianti produttivi introducendo la più spinta automazione e la completa computerizzazione.

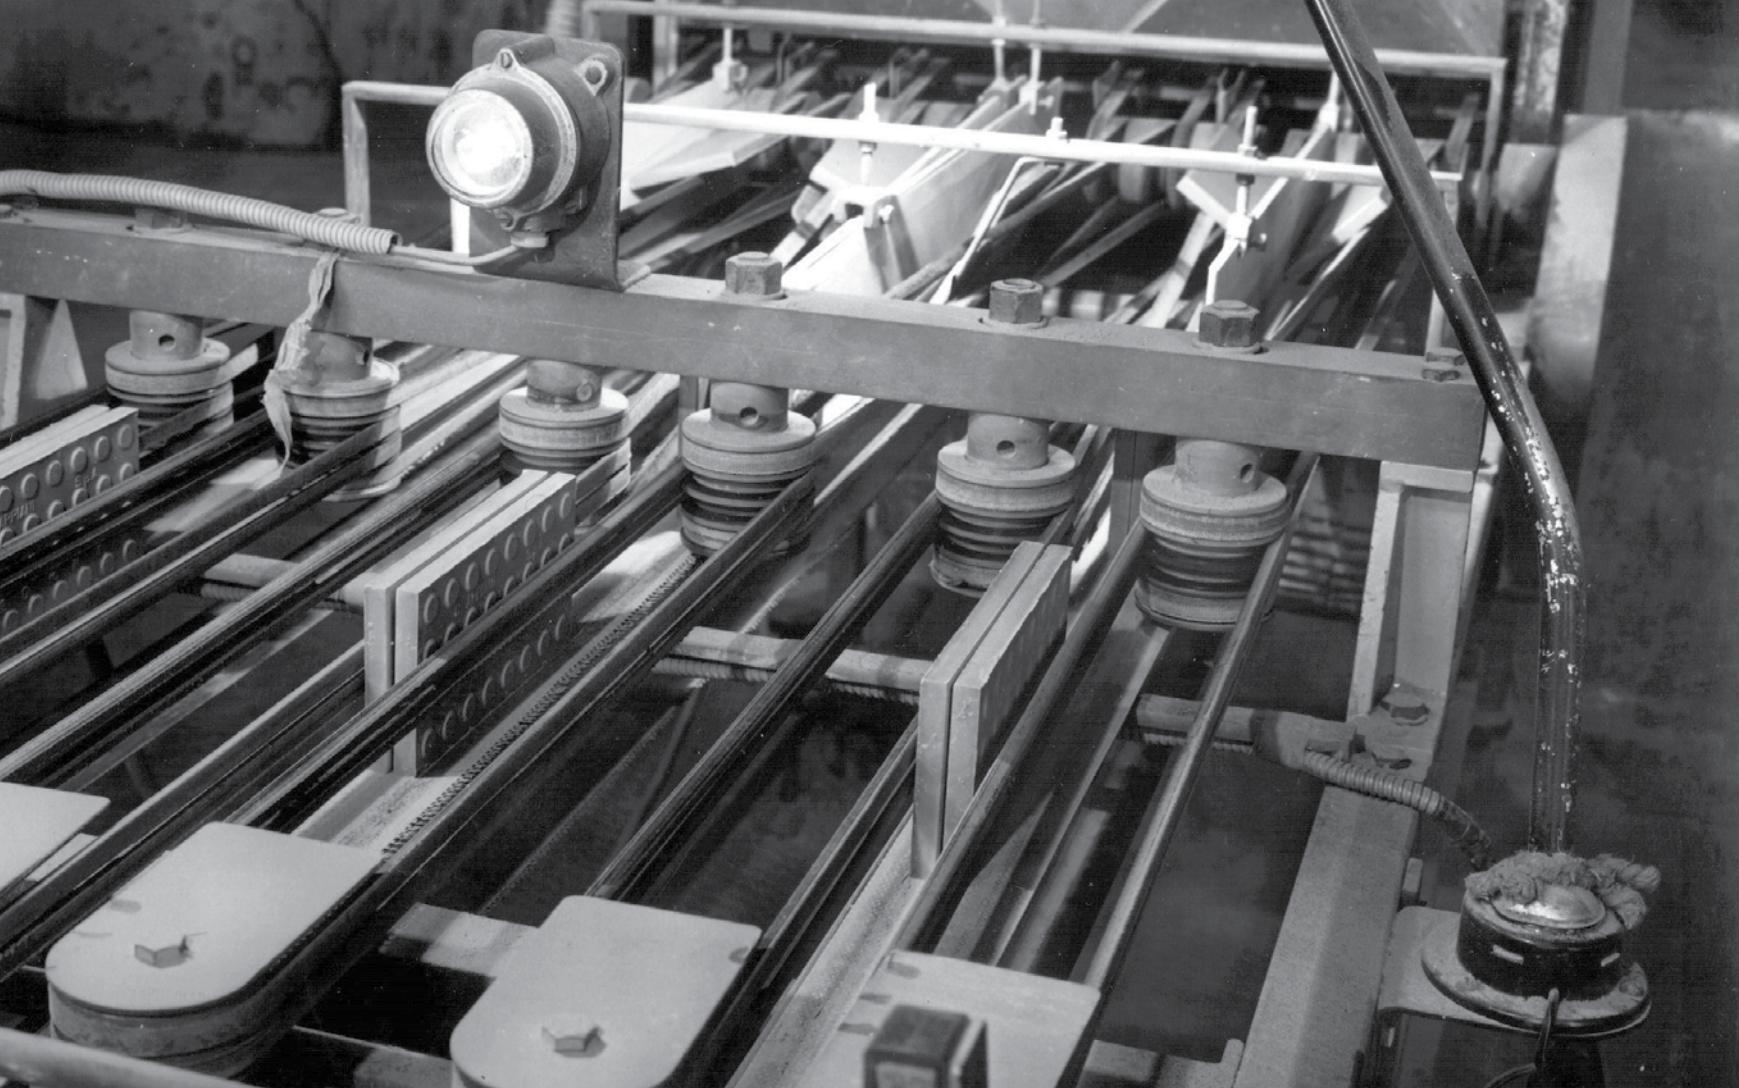

Throughout the period of fascism in the Twenties, the company worked to deliver orders for floor tiles for barracks, hangars, hospitals and railway stations. After the end of the war, it started to produce the "red stoneware" that the company became famous for during the period of reconstruction and the years of the economic boom. In 1960, the Appiani family embarked upon a policy of modernisation and started to work on projects with designers such as Giò Ponti and Pompeo Pianezzola. It completed the building of an innovative production plant the following decade to make glazed porcelain stoneware using exclusive "monopressocottura"

Durant les vingt années que l'Italie a vécues sous le régime fasciste, les commandes visent à satisfaire la réalisation du pavage des casernes, des hangars, des hôpitaux et des gares. Après la guerre commence la production du célèbre "grès rouge" par lequel Ceramica Appiani s'est distinguée au cours de la période consacrée à la reconstruction et au boom économique qui s'en est suivi. En 1960, la famille Appiani opte pour une politique de renouvellement et développe des collaborations avec des concepteurs et des designers tels que Gio' Ponti et Pompeo Pianezzola; dans les années 70, une usine particulièrement innovante est construite

duction de grès lisé au moyen

taken over by the Bardelli family in the Nineties well-known name in the industry, who decided to focus on reinstating tradition and heritage by developing the production of ceramic mosaics. Its manufacturing plant was completely rebuilt in 2000 with the introduction of the latest automation systems and computerisation.

de la "monocuiseur sous pression", une technologie de production tout à fait exclusive. Dans les années 90, la famille Bardelli, prestigieuse marquée très réputée dans ce secteur, rachète l'entreprise et la reprend la direction, développant la production de la mosaïque en céramique. En 2000, les installations sont entièrement renouvelées par l'introduction d'automatisation de pointe et par la complète computerisation.

Während des Faschismus erhält Appiani viele Aufträge für Bodenbeläge von Kasernen, Hangars, Krankenhäuser und Bahnhöfen. Nach dem Krieg begann die Herstellung des berühmten „roten Steinzeugs“, das den Betrieb während des Wiederaufbaus und wirtschaftlichen Aufschwungs der Nachkriegszeit geprägt hat. Im Jahr 1960 begann die Familie Appiani eine Strategie der Erneuerung, es beginnt die Zusammenarbeit mit Architekten und Designern wie Giò Ponti und Pompeo Pianezzola. Im Jahrzehnt danach wird eine innovative Anlage zur Herstellung glasierter Feinsteinzeug mit der exklusiven Technik „Monopressocottura“ (Einbrandpressverfahren) gebaut. In den 90er Jahren übernimmt die Familie Bardelli das Unternehmen, eine etablierte Marke der Keramikproduktion.

Heute stehen und investiert in die Produktion des Keramikmosaiks. Jahr 2000 wurden die Produktionsanlagen durch die Einführung innovativen Automatisierung und EDV komplett sa-

Durante los veinte años de fascismo, los encargos tienen que ver con pavimentaciones de cuarteles, hangares, hospitales y estaciones. Tras los eventos bélicos, da comienzo la fabricación del famoso "gres rojo" que ha caracterizado a la empresa en el periodo de la reconstrucción y del boom económico. En 1960, la familia Appiani inicia una política de renovación, desarrollando colaboraciones con proyectos y diseñadores como Giò Ponti y Pompeo Pianezzola. En la década siguiente, se construye una innovadora planta para la fabricación de cerámica sanitaria con la exclusiva tecnología de la "monococción bajo presión". En los años 90, la familia Bardelli, prestigiosa marca del sector, compra la empresa y, manteniendo sus tradiciones, continúa la producción cerámica. En 2000, se lleva a cabo una importante inversión, creando una planta automática informática.

В 20 летний период правления фашистов поставлялся материал для настила в казармах, ангарах, больницах и железнодорожных станций. После войны начинается производство известного "красного каменно-керамического изделия", которое характеризовало материал фабрик в послевоенный период восстановления и экономического подъема. В 1960 Appiani начинает политику обновления и развивает сотрудничество с такими конструкторами и дизайнером как Джо Понти и Помпео Пьянеццола. В следующем десятилетии построена новаторская установка для производства эмалированного каменно-керамического изделия с исключительной технологией "монопрессообжига". В 90-х годах семья Bardelli покупает фирму и, возвращая древние традиции, развивает производство керамических изделий. В 2000 реагируя на новые условия, компания проводит инновационные изменения, вводя в эксплуатацию новую автоматизированную производственную линию.

在法西斯统治的二十年期间，订单与军营、机库、医院、车站的地板饰面材料有关。接着在战争时期，开始了著名的“红瓷质砖”生产，它令公司在战后重建和经济繁荣期显得出类拔萃。1960年，阿皮亚尼家族开始更新和发展与Giò Ponti和Pompeo Pianezzola等建筑师和设计师合作的政策。在之后的十年中，制造了一种创新的釉面瓷砖质砖生产设备，具有独特的“一次压烧技术”。在九十年代，该行业领域的著名品牌Bardelli家族收购了本公司，并恢复了古老的传统，发展陶瓷马赛克的生产。2000年，引进最先进和完全计算机化的自动化生产设施，对生产设施进行全面更新。

# Creativity

Appiani. Ceramica per l'architettura ad alto contenuto estetico per la massima espressione della creatività legata alla funzionalità. Singoli prodotti e moduli compositi che i progettisti sono liberi di articolare in disegni e composizioni di forte valore decorativo e architettonico. Composizioni che parlano della creatività della vita e dell'inventiva dei loro progettisti. Appiani riscopre il fascino dei materiali di antica produzione come il mosaico e propone colori, formati e finiture per realizzare superfici multimateriche e campiture policromatiche, accostando forme e dimensioni della tradizione ceramica.

Appiani. Ceramics with superior aesthetic appeal for architecture; the guarantee of no constraints to creativity and no limits to functionality. Individual pieces and flexible modules enabling designers to create combinations, designs and layouts with great decorative finesse and architectural value. Layouts that illustrate the creativity of life and the inventive flair of their designers. Appiani has rediscovered the appeal of materials from the past like mosaics, offering colours, shapes and finishes to create surfaces using a variety of materials and blocks of multiple colours by combining shapes and dimensions of traditional ceramics.

Ceramica Appiani est synonyme de céramique pour l'architecture à l'esthétique haut de gamme permettant la plus haute expression de la créativité céramique liée à la fonctionnalité. Appiani a créé des produits individuels et des modules composites que les concepteurs sont libres d'ordonnancer en dessins et en compositions de haute valeur décorative et architectonique. Des compositions qui parlent à la créativité et à l'imagination des concepteurs. Appiani redécouvre le charme de la tradition comme la mosaïque, et propose des tonalités, des formats et des finitions pour réaliser des surfaces multimatiéristes et des rechampissages polychromes, par l'association de formes et de dimensions propres à la tradition céramique.

Cre

Appiani. Ceramica für die Architektur mit hohem ästhetischem Gehalt für den höchsten Ausdruck der Kreativität in Verbindung mit Funktionalität.  
Einzelne Produkte und zusammengesetzte Module drücken im Design und in den Zusammenstellungen einen hohen dekorativen und architektonischen Wert aus. Kompositionen, die die Kreativität des und den Erfindungsreichtum der Planer zum Ausdruck bringen. Appiani entdeckt die Faszination von Materialien der antiken Tradition neu, wie das Mosaik, und bietet Farben, Formate und Oberflächenausführungen, die für die Schaffung mehrfarbiger Flächen und Oberflächen wesentlich sind und unterschiedliche Materialien kombinieren, dabei werden Formen und Formate der Keramiktradition zusammengestellt.

Appiani. Cerámica para la arquitectura de alto contenido estético para la máxima expresión de la creatividad vinculada a la funcionalidad.  
Productos individuales y módulos compuestos que los proyectistas pueden articular libremente en dibujos y composiciones con un fuerte valor decorativo y arquitectónico. Composiciones que hablan de la creatividad de la vida y de la imaginación de sus proyectistas.  
Appiani redescubre el encanto de los materiales de antigua producción, como el mosaico, y propone colores, formatos y acabados para realizar superficies multimateriales y decoraciones policromáticas, combinando formas y dimensiones de la tradición cerámica.

Appiani - керамика для архитектуры с высоким эстетическим содержанием сочтаемоефункциональность и креативность. Отдельные продукты и модульные композиции, где конструкторы свободны в составлении дизайнерских и архитектурных стилей. Композиции, говорящие о творчестве жизни и изобретательности их конструкторов. Appiani вновь открывает очарование из материалов такого древнего производства как мозаика и предлагает цвета, форматы и отделку, чтобы реализовать поверхности с разными отделками и с разными цветами сочтая форматы и размеры керамической традиции.

阿皮亚尼。具有极高美学内涵的建筑陶瓷产品，是功能性和创意性有机结合的最高表达。每一单品和组合可以让设计师自由地衔接成具有装饰和建筑价值的花纹图案和组合。这些组合表现了它们的设计师的生活创意和创造力。阿皮亚尼重新发掘诸如马赛克等古老生产饰面材料的魅力，并推出各种颜色、规格和表面处理，通过陶瓷传统的各种形状和大小的巧妙搭配，创造多材料表面和多色彩背景。

# activity

# Technology

La produzione si articola in prodotti complementari ed integrabili tra loro realizzati con diverse tecnologie produttive. La "Monopressocottura" consente di ottenere prodotti ceramici i cui smalti e argille vengono pressati a secco. L'elevata temperatura di cottura garantisce al prodotto eccezionali qualità di durata e di resistenza ideali per molteplici applicazioni a pavimento e a rivestimento, sia in interno che in esterno.

La "Bicottura" prevede due cotture distinte per il supporto e per lo smalto successivamente applicato. Con tale tecnologia si ottengono superfici opache o brillanti con un'ottima definizione dei colori per un uso prevalentemente a rivestimento. Il "Gres porcellanato smaltato" si ottiene dalla cottura a temperatura molto elevata di un supporto compatto ricoperto in superficie con smalti selezionati e particolarmente tenaci e trova impiego a pavimento in ambito residenziale e commerciale a traffico moderato.

Production is divided into complementary products, made using various production technologies that can be combined with one another. The "Monopressocottura" technique is based on the use of dry pressed glazes and clays for the production of the ceramic product. The high firing temperature guarantees exceptionally durable and hardwearing products, ideal for countless potential applications as floor or wall coverings, indoors or outdoors. "Bicottura" or double firing has two separate firing cycles, first for the ceramic body and then the glaze, which is applied at a second stage. This technology is used to make ultra bright or matt surfaces with excellent colour definition, mainly for wall coverings. "Glazed porcelain stoneware" is made by firing a compact support at extremely high temperature after its surface has been coated with prime glazes that are particularly hard wearing. It is used for floor coverings in residential buildings subject to moderate traffic levels.

Appiani, ce sont des produits complémentaires réalisés avec différentes technologies de production pouvant s'intégrer les uns aux autres. La Monocuisson sous pression permet d'obtenir des produits céramiques où les émaux et les argiles sont soumis à la technique du pressage à sec. Le cycle de cuisson à des températures très élevées garantit au produit des qualités exceptionnelles de durée et de résistance qui conviennent à la perfection pour le revêtement des sols et des murs, aussi bien à l'intérieur qu'à l'extérieur. La Bicuisson est une technologie qui prévoit deux cuissons distinctes, pour le support et pour l'émail qui y est appliqué ensuite. Cette technologie permet d'obtenir aussi bien des surfaces mates que brillantes ayant une excellente définition des couleurs, utilisées pour le revêtement. Le "Grès cérame émaillé" est obtenu par la cuisson à une température d'un support compact dont la surface est recouverte de glaçures sélectionnées et particulièrement résistantes, employé pour revêtements de sols résidentiel comme commercial dans des usages modérés.

Es werden komplementäre Produkte unter Einsatz unterschiedlicher Fertigungstechniken hergestellt, die zueinander passen. Das Verfahren der „Monopressocottura“ (Einbrandpressverfahren) erlaubt es, Keramikerzeugnisse herzustellen, deren keramische Glasuren und Tone trocken gepresst werden. Die hohe Brenntemperatur gewährleistet eine außergewöhnliche Haltbarkeit und Festigkeit, ideal für viele Anwendungen als Bodenbelag und Wandverkleidung in Innen- und Außenbereichen.

Der „Zweibrand“ verlangt zwei unterschiedliche Brenngänge, den ersten für den Scherben und den zweiten für die Glasur, die später auf den Untergrund aufgebracht wird. Mit dieser Technologie erhält man matte und glänzende Oberflächen mit einer ausgezeichneten Definition der Farben für einen Einsatz vor allem als Wandverkleidung. „Glasiertes Feinsteinzeug“ erhält man durch den Einbrand eines kompakten Scherben, der an der Oberfläche mit ausgewählten und haltbaren Glasuren ausgestattet wird. Diese werden vor allem als Belag in Wohn- und Büroräumen mit mäßiger Nutzung verwendet.

La producción se articula en productos complementarios e integrables entre sí, realizados con distintas tecnologías de fabricación. La "Monococción bajo presión" permite obtener productos cerámicos cuyos esmaltes y arcillas son prensados en seco. La elevada temperatura de cocción garantiza al producto excepcionales cualidades de duración y resistencia, ideales para múltiples aplicaciones de pavimento y revestimiento, tanto en espacios interiores como en exteriores.

La "Bicocción" prevé dos cocciones distintas para el soporte y para el esmalte, aplicado sucesivamente. Dicha tecnología permite obtener superficies mates o brillantes en una óptima combinación de los colores que predominan en la revestimiento porcelánico. El "Gres esmaltado" se obtiene a través de la cocción a una elevada temperatura de un soporte recubierto con esmalte especializado para su contraste con el vidrio. Los vidrios tienen una definición comercial más sólida.

Производятся разные материалы, которые сочетаются и дополняют друг друга, используя разные производственные технологии.

Монопрессообжиг – технология прессования эмали и глины сухим способом. Высокая температура обжига гарантирует продукту исключительное качество износостойкости, делая его подходящий и для пола и для стен, для внутренних и наружных помещений.

Двойнообжиг – технология предусматривает два обжига. В начале обжигается основа из глины и, после нанесения эмали на плитке, происходит второй обжиг. Такая технология позволяет получить матовые и глянцевые поверхности с четкой цветовой гаммой для настенной укладки.

Эмалированный керамогранит производится при обжиге с высокой температурой однородного гранита с поверхностью, покрытой прочным эмалевым покрытием, применение которого коммерческих и бытовых и помещений.

产品采用不同的生产工艺制成，相互之间可以互补和整合。

“一次压烧”令陶瓷产品的釉料和粘土可以进行干式压制。再经高温烧成，可确保产品品质卓越、使用寿命长、结实坚固，是室内外地板和墙壁多次铺设的理想选择。

“二次烧成”是对砖体和之后涂抹的釉料的两次不同烧成。通过这项技术可以获得哑光或闪亮的表面和极佳的色彩，主要用于墙砖。“釉面瓷质砖”以非常高的温度对表面涂抹了粘性极强的精选釉料的致密砖体进行烧制，适合住宅和人流量适中的商业环境。

Appiani presenta un programma di ceramica tecnica per l'architettura ad alto contenuto tecnico, estetico e funzionale, specificamente pensato per l'architettura moderna.

Tre distinte tecnologie, specializzate per funzioni d'uso, si intrecciano per dare vita ad un programma prodotti che offre la massima libertà progettuale, dal mosaico al grande formato, consentendone l'uso dagli spazi abitativi alla città.

Appiani has a range of technical ceramic tiles for buildings with top-level technical, aesthetic and functional design, specifically for modern architecture.

Three distinct technologies, designed according to use, combine to create a product range that provides maximum scope for design, from small mosaics to larger sizes, enabling these products to be used in homes or urban areas.

Appiani présente un programme de céramique technique pour l'architecture à haut contenu technique, esthétique et fonctionnel, spécialement conçu pour l'architecture moderne. Trois technologies distinctes, spécialisées pour des fonctions d'utilisation, s'entrecroisent pour donner vie à un programme de produits qui offre le maximum de liberté en ce qui concerne le projet, de la mosaïque au grand format, permettant ainsi l'utilisation aussi bien dans des habitations qu'en ville.

Appiani bietet ein Sortiment technischer Keramik für die Architektur mit einem hohen technischen, ästhetischen und funktionellen Gehalt, welches speziell für die moderne Architektur entwickelt wurde.

Drei unterschiedliche, je nach Einsatzfunktionen spezialisierte Technologien, verflechten sich miteinander, um ein Produktsortiment entstehen zu lassen, das größte Gestaltungsfreiheit bietet, und zwar vom Mosaik bis zum großen Format, und so den Einsatz sowohl in Wohnräumen als auch in der Stadt ermöglicht.

Appiani presenta un programa de cerámica técnica para la arquitectura de elevado contenido técnico, estético y funcional, específicamente pensado para la arquitectura moderna.

Tres tecnologías distintas, especializadas por funciones de uso, se entrelazan para dar vida a un programa de productos que ofrece la máxima libertad de proyecto, desde el mosaico hasta el gran formato, permitiendo su uso tanto en espacios residenciales como en la ciudad.

Appiani представляет программу высокотехничной керамики для архитектуры с техническими, эстетическими и функциональными качествами, разработанную для современной архитектуры.

Три разных технологии, специализированные согласно функциям их использования, пересекаясь, создают программу изделий, которая предоставляет полную свободу в проектировании, начиная с мозаики и заканчивая большими форматами, и позволяет применять их как в жилых домах, так и для убранства города.

Appiani推出一个技术陶瓷产品系列，适用于对外观美感要求高、功能性强的高技术含量建筑，是现代建筑的首选陶瓷。

针对不同的功能用途进行专业化分工的四完全不同的技术，相互融合运用而产生这套产品组合，包括从马赛克到大尺寸规格的瓷砖，赋予用户广阔的设计想象空间，适用于家居空间和城市装饰。

# Anthologhia

MONOPRESSOCOTTURA

I colori della linea Anthologhia in monopressocottura hanno la caratteristica di proporsi con diverse tonalità che permettono di realizzare campiture piacevolmente "mosse". Anthologhia è un prodotto con superficie smaltata semilucida. La linea è completata da pezzi speciali e finiture antisdruciolio.

The colours of the Anthologhia line in single-press firing have the particular characteristic of being in different shades creating fields with a pleasant "wavy" effect. Anthologhia is a product with a semi-glossy glazed surface. The line is completed by special trim pieces and skid-proof surface finishes.

Les coloris de la ligne Anthologhia en monocuisson sous pression sont proposés dans tonalités différentes. Cette caractéristique permet de réaliser des réchampissages agréablement «ondoyants». Anthologhia est un produit à la surface émaillée semi-lustrée. La ligne est complétée par des pièces spéciales et des finitions antidérapantes.

Die Farben der im Einbrandpressverfahren hergestellten Linie Anthologhia werden in unterschiedlichen Nuancen angeboten, die so verlegt werden können, dass eine interessante „bewegte“ Wirkung entsteht. Anthologhia ist eine Fliese mit glasierter, halbglänzender Oberfläche. Diese Linie beinhaltet auch Formteile und Fliesen mit rutschfesten Oberflächen.

Los colores de la línea Anthologhia en monococción por prensado están caracterizados por proponerse en tonalidades diferentes de color que permiten realizar efectos agradablemente "movidos". Anthologhia es un producto con acabado esmaltado semibrillante. La línea se completa con piezas especiales y acabados antideslizamiento.

Цвета серии монопрессообжига «Anthologhia» характеризуются разнообразием цветового тона, что позволяет создавать поверхности с приятным эффектом «волнистости». Anthologhia – это изделие с полуглянцевой эмалированной поверхностью. Серию дополняют специальные элементы и противоскользящая отделка.

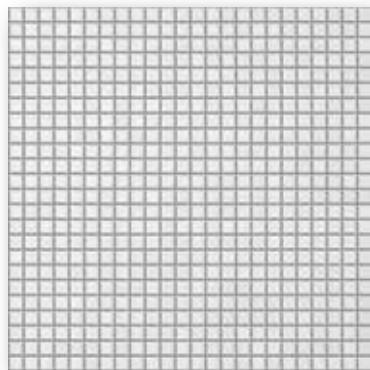

一次压制烧成的 Anthologhia 系列的颜色 具有不同色调， 可实现令人愉快的 “波浪” 效果。 系列备有特殊件和防滑表面处理。

# Metallica

MONOPRESSOCOTTURA

La linea Metallica in monopressocottura ha come caratteristica la finitura metallizzata della superficie che, unitamente al movimento dato dalle diverse tonalità, permette la realizzazione di campiture in mosaico con particolari effetti di luce e riflessione negli arredi d'interni così come nei rivestimenti di facciate esterne.

The Metallica line in single-press firing has the characteristic metal finish that, with its different shades, allows the realisation of mosaic projects with distinguished light and reflection effects suitable for design of interiors and for covering of exterior facades.

La série métallique en monocuisson sous pression, propose une finition de surface métallique associé avec une combinaison de différentes tonalités de couleurs et de formats. Cette association permet de réaliser des mosaïques avec une profondeur et des effets de lumière, aussi bien en intérieur qu'en extérieur.

Die Linie Metallica in Einbrandpressverfahren zeichnet sich durch die metallische Glasur- Vollendung aus, die, gemeinsam mit der lebhaften Oberfläche, durch die verschiedenen Metall- Schattierungen, ästhetische Verkleidungs- Verarbeitungen in innen wie in außen Bereich, mit besonderen Spiegelung Effekten, ermöglicht.

La linea Metallica en monococción por prensado presenta un acabado metálicoizado de la superficie que, junto al movimiento ofrecido de las diferentes tonalidades, permite de realizar con el mosaico particulares efectos de luz y reflexión al interior así como al exterior, en los revestimientos de fachadas.

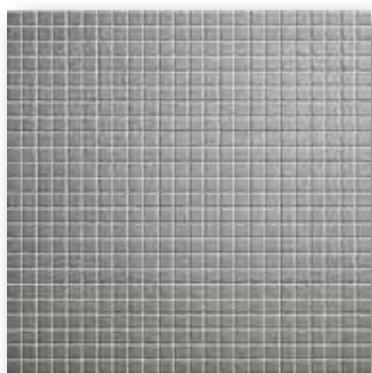

О отличительной особенностью серии керамических плиток одноразового обжига под прессом "Металлика" является металлизированная отделка поверхности, что вместе с вариациями цветового тона позволяет выкладывать мозаичные поверхности с особым световым эффектом и отблеском, как для отделки интерьеров, так и для облицовки внешних фасадов.

一次压制烧成的 Metallica 系列 的特点是表面具有 金属处理效果，连同不同色调产生的动感，令铺设马赛克的表面 具有特殊的光泽，并对室内家具以及 室外正面的面砖 产生反光效果。

# Seta

MONOPRESSOCOTTURA

Affascinanti giochi di luci, riflessi e superfici vengono proposti in una sfida di contrasti con inusuali abbinamenti di chiaro-scuri grazie a smalti ceramici con finitura opaca. Le serie "Seta" in monopressocottura è proposta per tutti gli usi a rivestimento in ambito residenziale, commerciale e per i luoghi del benessere. L'uso a pavimento di tali prodotti è consigliato per bagni residenziali.

Fascinating plays of light, hues and surfaces are proposed in a game of contrast with unusual black and white combinations thanks to ceramic glazes with a matt finish. The Seta single-press firing ranges is suited to all tiling uses in residential, commercial and wellbeing settings. These products are recommended for floor tiling only in residential bathrooms and other areas with light traffic.

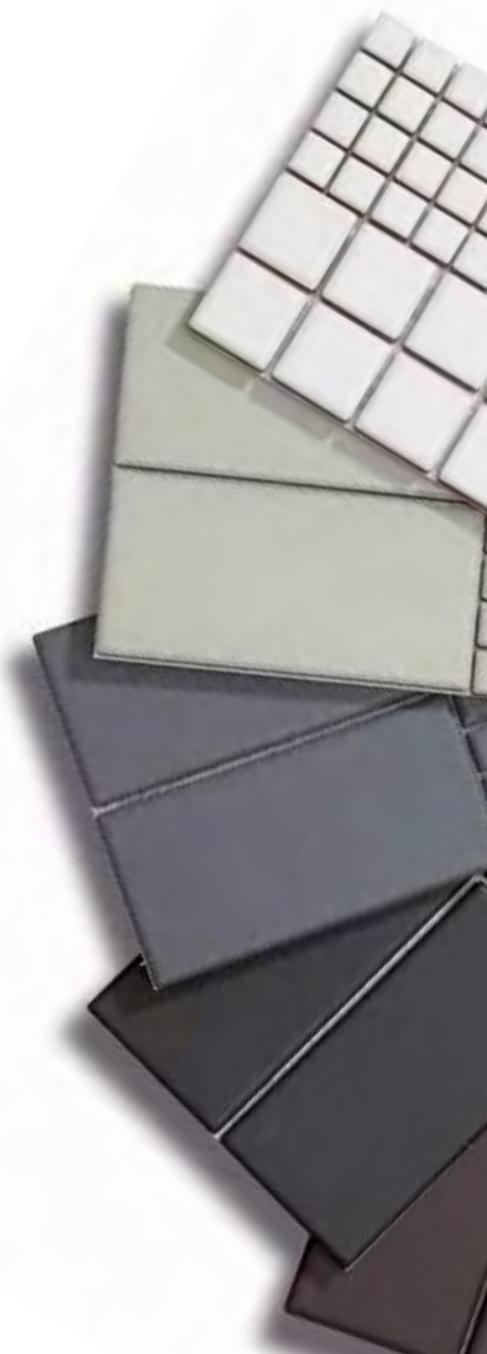

De fascinants jeux de lumière, de reflets et de surfaces sont proposés, provoquant des contrastes par des associations inédites de clairs-obscur grâce à des émaux céramiques avec une finition mate. Les séries Seta en monocuissson sous pression sont proposées pour toutes les applications comme revêtement mural dans le domaine résidentiel, commercial et les lieux de détente. L'utilisation de ces produits pour le carrelage des sols est conseillée dans les salles de bains du secteur résidentiel et les espaces où le passage est modéré.

Geboten werden faszinierende Lichtspiele, Reflexe und Oberflächen mit reizvollen Hell-Dunkel-Kontrasten, die durch Keramikglasuren mit matter Oberfläche entstehen. Die Serie Seta, die mit dem Einbrandpressverfahren hergestellt wird, ist für die Wandverkleidung in Wohn-, Gewerbe- und Wellnessbereichen ideal. Die Verwendung als Bodenbelag wird nur für Bäder in Wohnbereichen und für Räume mit geringer Trittbelaastung empfohlen.

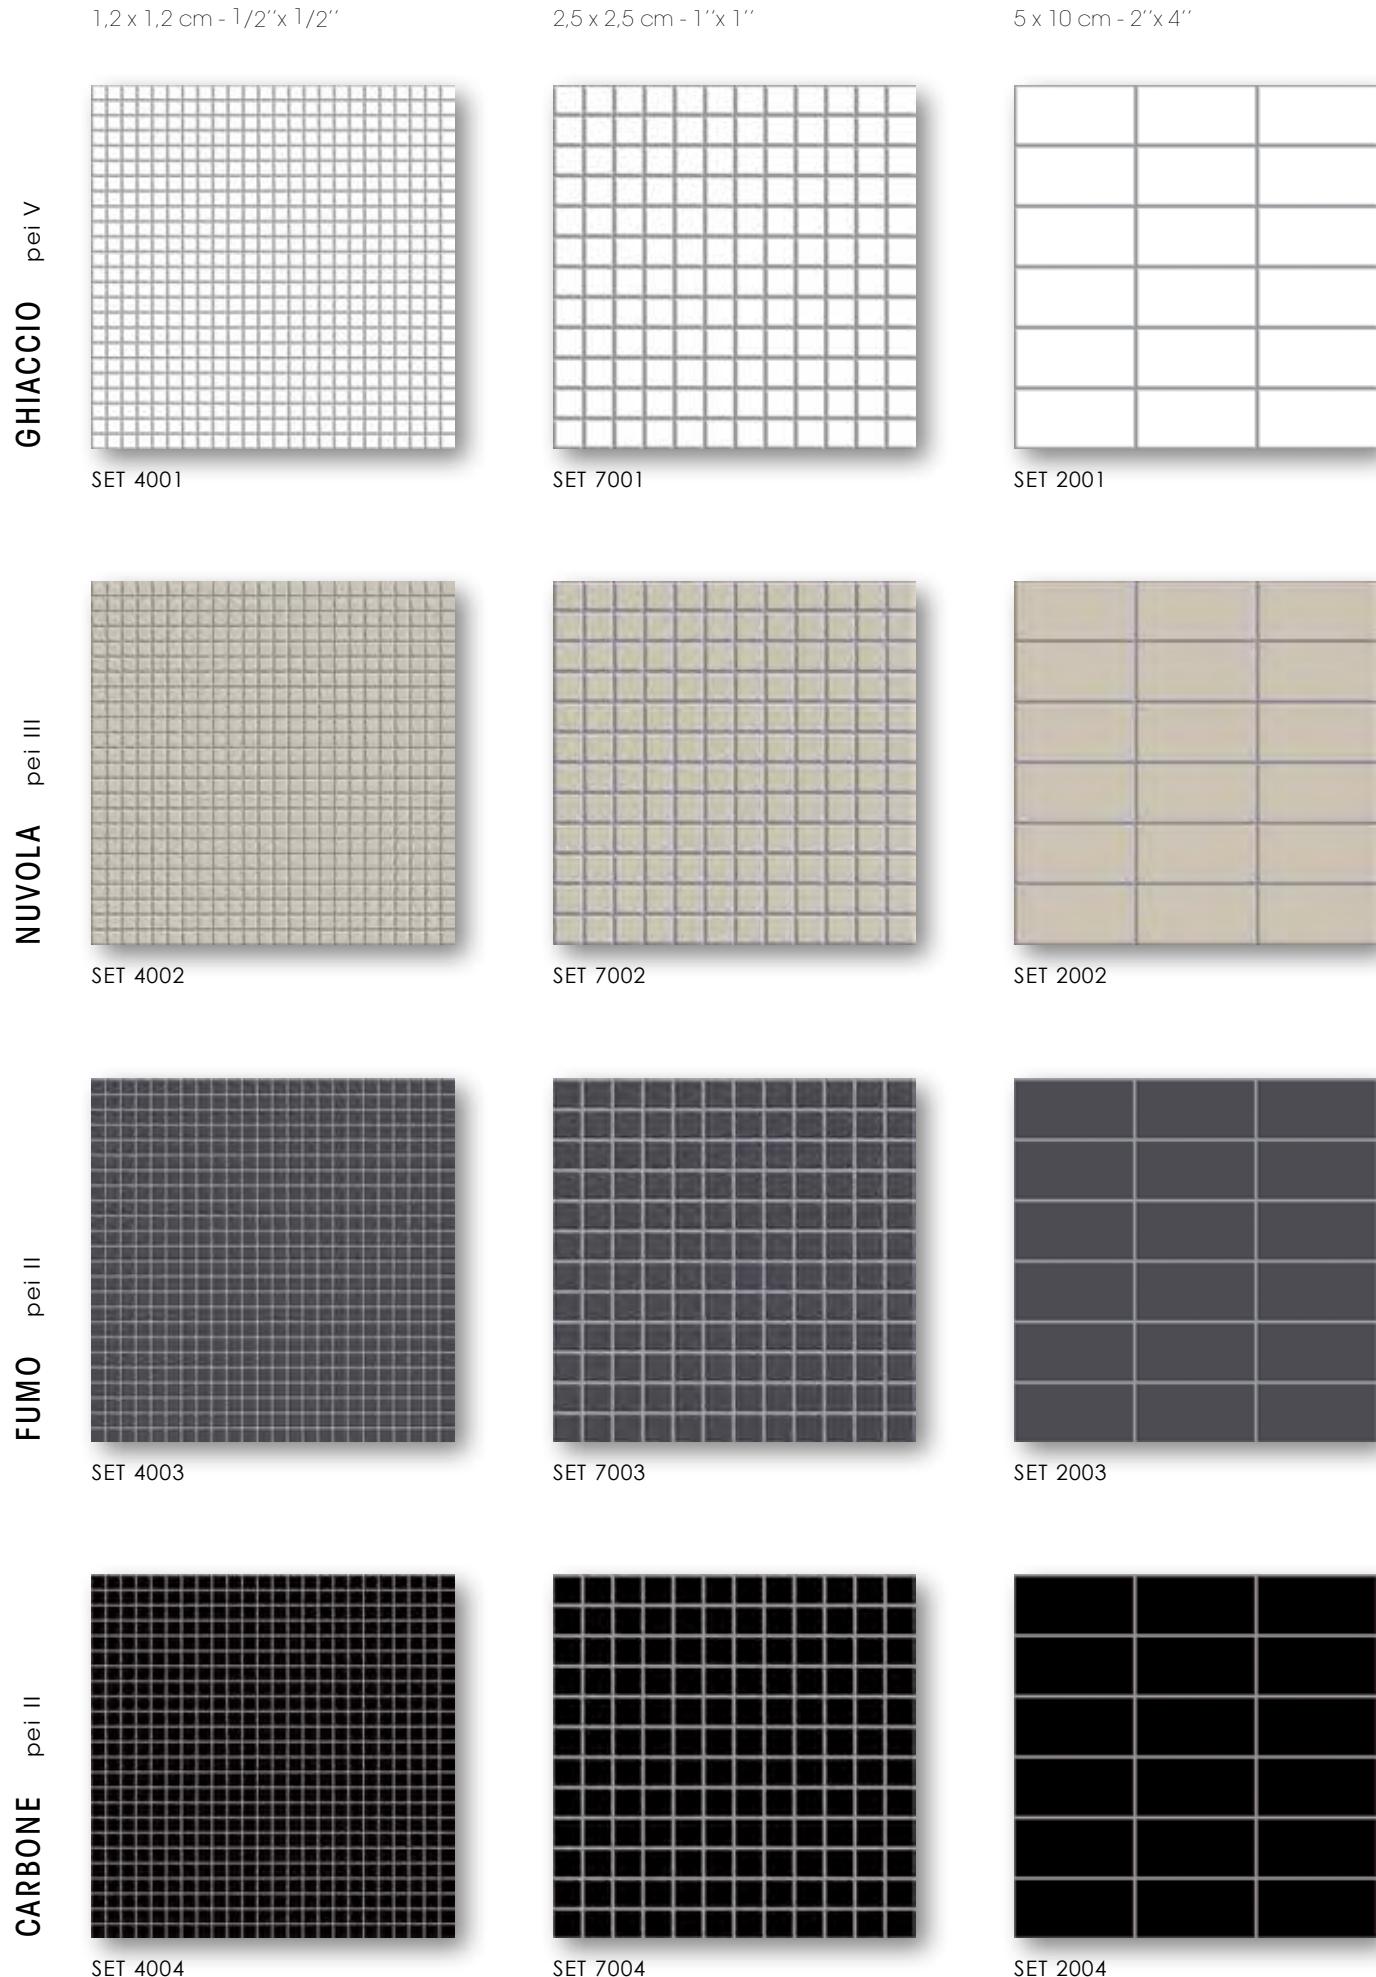

Fascinantes juegos de luces, reflejos y superficies son propuestos en un desafío de contrastes, caracterizados por inusuales combinaciones de claroscuros y obtenidos con esmaltes cerámicos de acabado mate. La serie Seta de monococción por prensado se propone para todos los usos como revestimiento en los ámbitos residencial y comercial y para los lugares dedicados al bienestar. El uso de dichos productos como pavimento está aconsejado para baños residenciales.

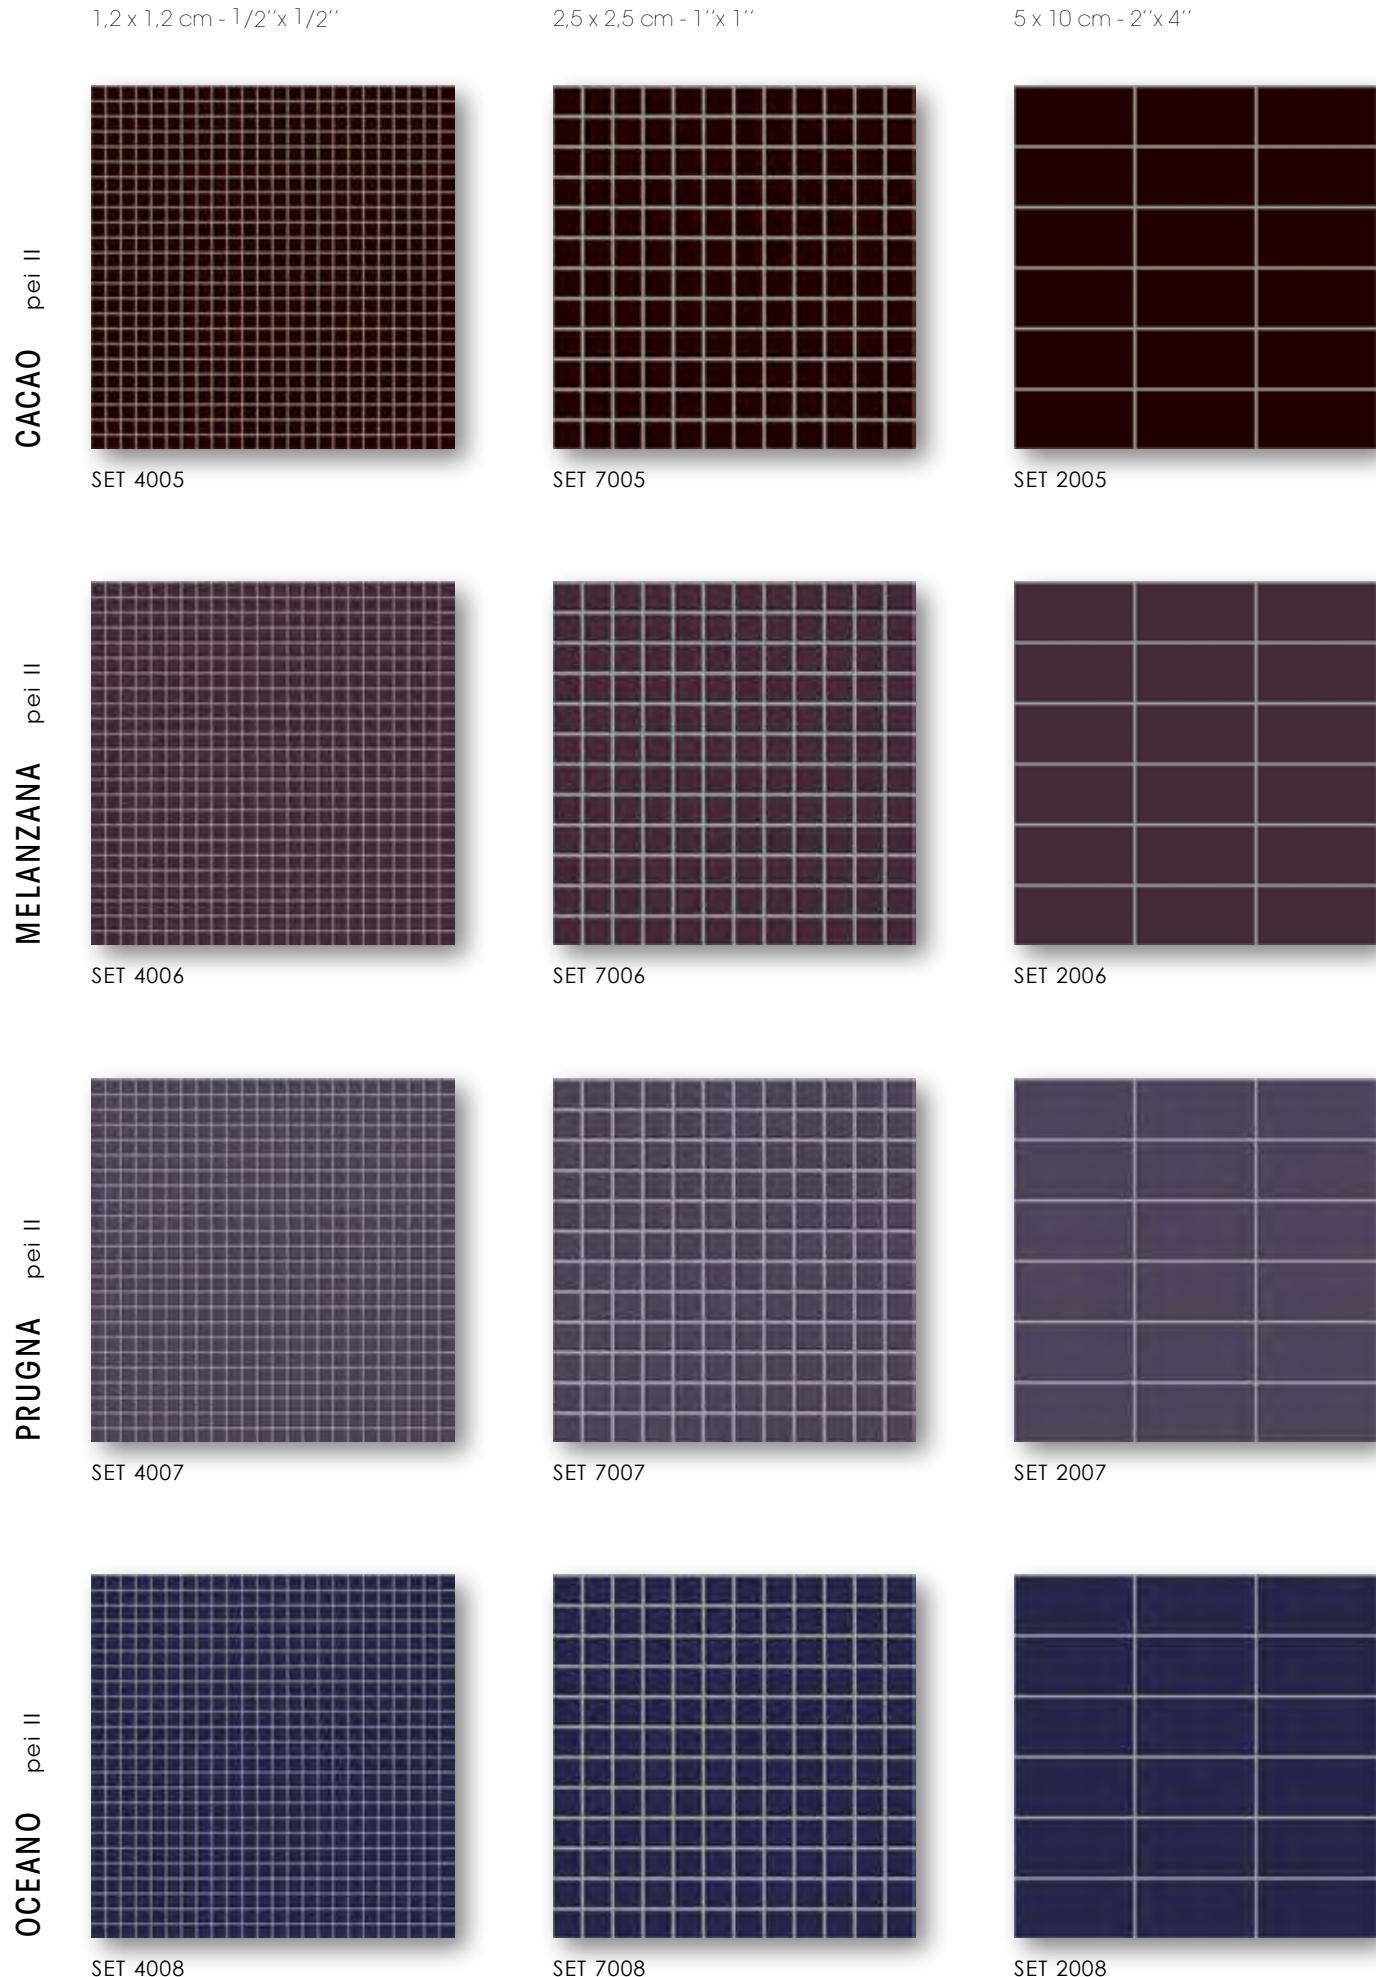

Очаровательные переливы, отблески поверхности предлагаются для создания контрастов с оригинальным сочетанием светотеней благодаря матовой обработке. Серия монопрессообжига "Seta" предлагается для использования в жилых, коммерческих помещениях и помещениях бассейна и сауны. Напольная укладка только ванных комнатах жилых помещений.

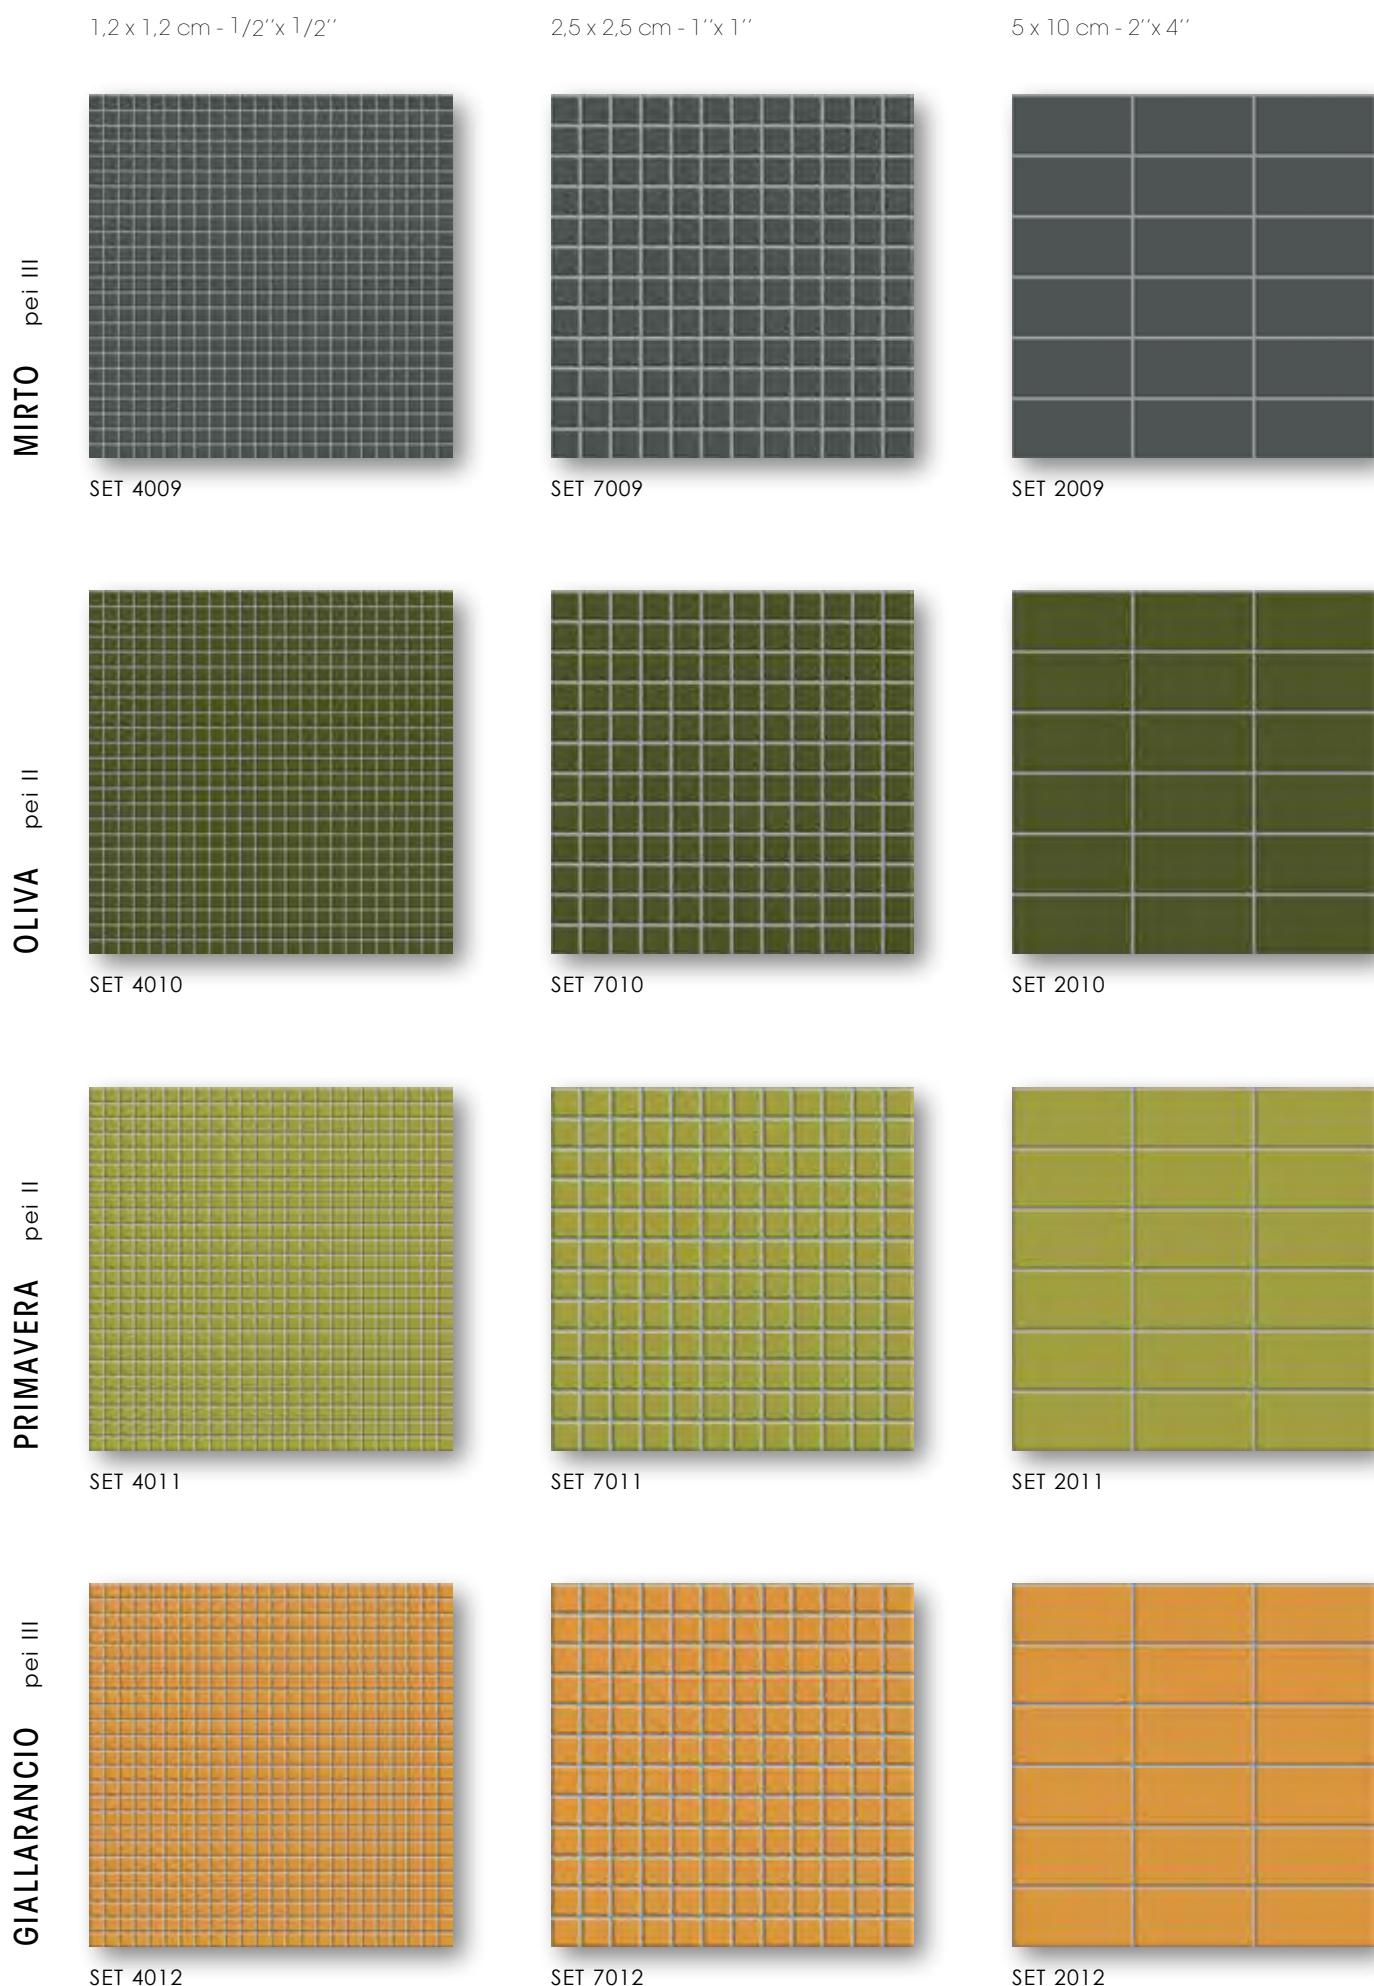

陶瓷釉料具有哑光表面处理，光与反射光幻变迷人，明暗对比组合与众不同。“Seta”系列一次压烧产品可用于住宅、商业场所和康体场所的墙壁铺设。使用这些产品铺设地板时，建议用于住宅卫生间和人行少的环境。

# Mix

by Antonella Frezza  
MONOPRESSOCOTTURA

Le miscele di mosaico ceramico Appiani Mix sono prodotte in monopressocottura, la tecnica che unisce lo smalto all'argilla mediante la pressatura a secco. Le serie Anthologhia, Seta, Metallica e Open Space si incontrano secondo percentuali calibrate creando innumerevoli miscele raccolte per affinità emotiva nelle collezioni Styling, Wellness, Outdoor e Architecture. Con risultati inediti e sorprendenti uniscono effetti di luce e di finitura in un affascinante caleidoscopio di idee, tutte intercambiabili, utilizzabili sia a pavimento che a rivestimento.

Appiani Mix ceramic mosaic mixes are produced in single-press firing a technique which fixes glaze to clay by dry pressing. The Anthologhia, Seta, Metallica and Open Space ranges are mixed according to calibrated percentages, creating an infinity of different mixes grouped by emotional affinity in the Styling, Wellness, Outdoor and Architecture collections. With unique, surprising results, they combine light and finish effects in a fascinating kaleidoscope of ideas, which can be mixed and matched and used for both floor and wall tiling.

Les mélanges des mosaïques en céramique Appiani Mix sont produits en monocuisson sous pression, la technique qui incorpore l'émail à l'argile pendant le pressage à sec. Les séries Anthologhia, Seta, Metallica et Open Space sont mélangées selon des pourcentages déterminés. Les assortiments sont nombreux et regroupés par affinités émotionnelles dans les collections Styling, Wellness, Outdoor et Architecture. Résultat ? Des effets originaux et surprenants jouent avec la lumière et la finition pour former un extraordinaire kaléidoscope d'idées, toutes interchangeables, à utiliser tant pour le sol que sur le mur.

Die Mischungen des Keramikmosaiks Appiani Mix werden im Einbrandpressverfahren hergestellt, die Technik, die den Ton durch Trockenpressen mit der Glasur verbindet. Die Serien Anthologhia, Seta, Metallica und Open Space treffen gemäß präzisen Anteilen zusammen und bilden zahlreiche Mischungen, die nach gefühlbetonter Affinität in den Kollektionen Styling, Wellness, Outdoor und Architecture zusammengefasst sind. Mit neuen und überraschenden Ergebnissen werden Lichteffekte und Verarbeitungen in einem faszinierenden Ideen-Kaleidoskop vereint, die austauschbar sind und für Böden und Wandverkleidungen verwendet werden können.

Las mezclas de mosaico cerámico Appiani Mix se fabrican por monococción por prensado, la técnica que une el esmalte a la arcilla mediante el prensado en seco. Las series Anthologhia, Seta, Metallica y Open Space se obtienen según porcentajes calibrados creando innumerables mezclas reunidas por afinidad emotiva en las colecciones Styling, Wellness, Outdoor y Architecture. Con resultados inéditos y sorprendentes unen efectos de luz y de acabado en un calidoscopio atractivo de ideas, intercambiables entre sí, que pueden utilizarse para revestir el suelo o la pared.

Миксы из керамической мозаики Appiani Mix производятся из мозаики монопрессообожига, в ходе которого эмаль и глина соединяются путем сухого прессования. Серии Anthologhia, Seta, Metallica и Open Space смешиваются согласно установленному соотношению процентных долей для создания разнообразных миксов, соединенных по эмоциональной близости в стилевых подгрупп Styling, Wellness, Outdoor, Architecture. Необычные и удивительные эффекты света и отделки собираются в очаровательный калейдоскоп взаимозаменяемых идей, как для настенной, так и для напольной укладки.

Appiani Mix 陶瓷马赛克混合搭配系列以一次烘烧成形生产，这一工艺通过干压法将釉料压制到粘土上。Anthologhia、Seta、Metallica 和 Open Space 等系列按照调好的百分比组合，创造了无数混合搭配，并根据所产生的“情感共鸣”而收集在 Styling、Wellness、Outdoor、Architecture 系列中。效果出人意料、前所未有的，并且结合光泽、表面处理效果，迷人的创意像万花筒般变幻无穷，全部可以互换，用于地板或墙壁的铺设均可。

# Create

Non smettere di sognare.

Uno per uno, i punti-colore scompongono l'idea e la ricompongono in centinaia di tessere ceramiche. L'immagine pensata diventa opera finita. All'infinito.

Never stop dreaming.

One by one, the colour dots dissolve the idea and recompose it in hundreds of ceramic mosaic tiles. The image designed becomes a finished work. Forever.

Rêver, encore et toujours.

Une idée se fait jour et voilà qu'un par un, les points de couleur la décomposent pour la ecomposer à l'aide de centaines de tesselles céramiques. L'image créée devient l'œuvre accomplie. A l'infini.

Hören Sie niemals auf, zu träumen.

Die Farbpunkte entwickeln, jeder für sich, die Idee, die dann aus Tausenden von osaiksteinchen aus Keramik zusammengesetzt wird. Die Bildidee wird zum fertigen Werk. Und setzt sich unendlich fort.

No dejes de soñar.

Uno por uno, los puntos de color descomponen el concepto y lo componen otra vez con centenares de teselas cerámicas. La imagen pensada se transforma en obra completa. Al infinito.

Не переставай мечтать.

Одна за другой, цветные точки разбивают идею на части и воплощают ее, собирая из сотен керамических плиточек. Придуманное изображение становится законченным произведением. До бесконечности.

无止境的梦想。

通过大量的一粒一粒的颜色陶瓷砖，把你的梦想中的图画变成现实中永恒的作品。

## Composizioni Personalizzate Artistiche e Figurative

Personalised compositions Artistic & Figurative

Compositions personnalisées Artistiques & Figuratifs

Persönlich gestaltete Kompositionen Artistische Entwürfe & Bildliche Entwürfe

Composiciones personalizadas Artísticas & Figurativas

Индивидуальные композиции Художественные & Изобразительные
