INFORMAZIONI_INFORMATION

Brixdesign è il nome del gruppo di ricerca interno a Brix (oggi costituito da Massimo Nadalini e Davide Trentini) che da sempre indaga la possibilità di restituire dignità estetica al materiale ceramico, spesso relegato a copia di altri materiali solo apparentemente più nobili.

Desideroso di non fare né di seguire le mode, Brixdesign lavora sul gres porcellanato come materiale per l'architettura. Lontano da ogni forma di decoro lo stile di Brixdesign si caratterizza per essenzialità e sottrazione, parallelamente ad una cura maniacale per i dettagli.

Brixdesign is the name of Brix' in-house research group (today consisting of Massimo Nadalini and Davide Trentini). The group has always investigated opportunities for restoring the aesthetic dignity of ceramic materials, all too often relegated to a role of copying other, apparently more noble materials.

Determined neither to lead nor to follow fashion, Brixdesign works with fully vitrified stoneware as their chosen architectural material. Distinct from all forms of decoration, Brixdesign's style is characterised by essentiality and subtraction, complemented by a manic attention to detail.

LO STUDIO Design

Il profilo Borderline F permette di creare uno scurello sollevando il rivestimento. La congiunzione di due superfici risolta attraverso il loro distacco.

A Borderline F profile allows you create a rabbet by raising the covering. Resolve the problem of joining two surfaces by separating them.
