### The CEVI "Recipe"

~ Cevi quality is assured by a very long handicraft tradition in the production of top -level tiles. Our products are hand painted. The glazes come from Vietri, made with traditional craftsman methods and strengthened with sea sands. The craftsman's hand makes each Cevi tile unique and unrepeatable.

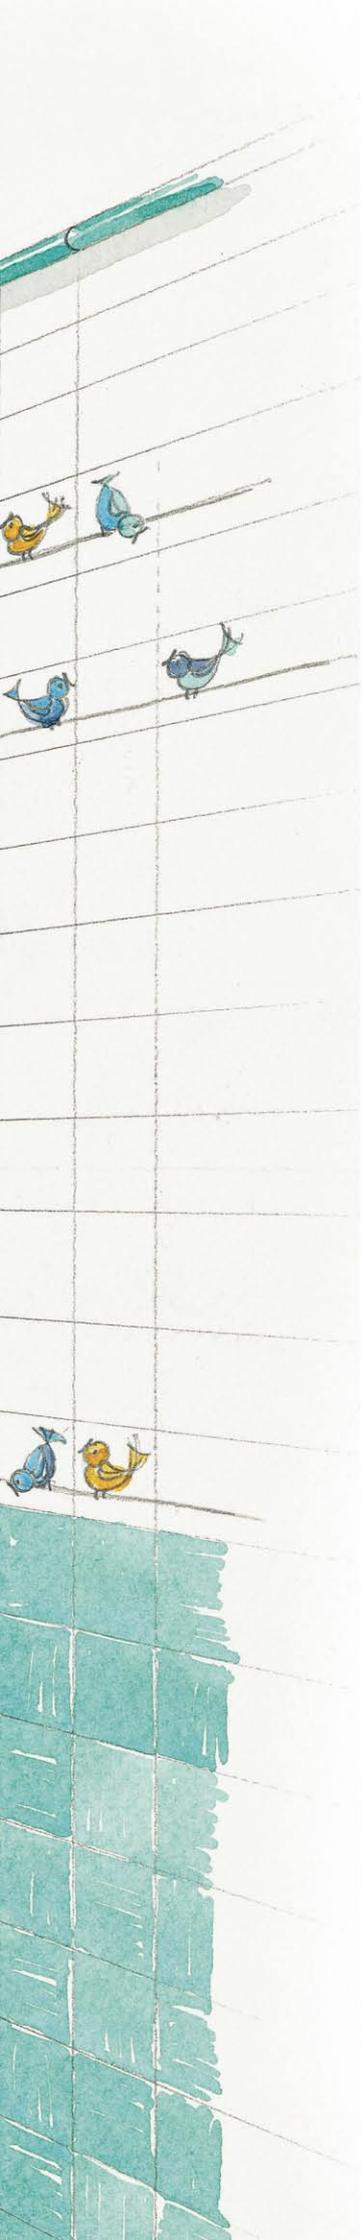

That is why our products may sometimes come in different shades and present small dots, slight surface imperfections, brush marks and irregular matching. The basis of working is represented by the old glaze "Bianco Vietri", whose main features are its effect of depth, its special hardness and wear resistance (PEI 4).

Owing to the traditional nature of our manufacturing process it is advisable to mix tiles before they are laid to obtain the best chromatic effect.
