In una vecchia cassa di legno dimenticata per anni in un deposito, abbiamo trovato una trentina di lastre di pietra provenienti dalla Côte-d'Or Francese.

In origine era un materiale nuovo, pulito, squadrato, poi il caso ha voluto che venisse smarrito ed il tempo ha potuto lasciare le proprie tracce su ogni singola lastra stivata.

Le pietre, appoggiate una sull'altra, hanno creato percorsi preferenziali per polveri e sali, formando sulla superficie un'anticatura unica.

STORY

board

Raking through an old wooden crate abandoned for years in the corner of a depot, we came across thirty or so stone slabs from France's Côte-d'Or department. Originally the material had been pristine and new with sharp edges, then by some twist of fate it was misplaced, allowing time to leave its mark on every slab stored away. The stones, piled one upon another, created natural channels for dust and mineral salts, forming uniquely antiqued surfaces.

Dans une vieille caisse de bois, oubliée des années durant dans un entrepôt, nous avons découvert une trentaine de pierres originaires de la Côte-d'Or française. À l'origine, elles étaient nouvelles, propres et carrées, puis elles ont été égarées et le temps a pu laisser ses traces sur chacune d'entre elles. Amassées les unes sur les autres, les pierres ont formé des parcours préférentiels pour la poussière et le sel qui, à leur tour, ont entraîné un vieillissement unique à la surface.

In einer Holzkiste, die jahrelang vergessen in einem Lager stand, haben wir rund dreißig Steinplatten aus der französischen Region Côte-d'Or gefunden. Ursprünglich war das neue Material sauber und mit rechtwinkligen Kanten. Dann hat der Zufall gewollt, dass es abhanden kam, so dass die Zeit an jeder gelagerten Platte ihre Spuren hinterlassen konnte. Die aufeinanderliegenden Steine unterlagen der Einwirkung von Staub und Salzen, so dass sich eine einzigartige Alterspatina herausbildete.

En un viejo baúl de madera olvidado durante años en un almacén, hemos hallado una treintena de losas de piedra provenientes de la Côte-d'Or francesa. En origen era un material nuevo, limpio, bien cortado, pero el azar ha querido que se extraviara y el tiempo ha podido dejar su huella en cada una de las placas guardadas. En las piedras, apiladas la una sobre la otra, se fueron dibujando los recorridos seguidos por el polvo y las sales, dando lugar a una superficie envejecida única.

В старом деревянном ящике, долгие годы лежавшем на складе, мы нашли три десятка каменных плит из французского региона Кот-д'Ор. Изначально это был новый, чистый материал прямоугольной формы, случайно пропавший. По этим причинам время успело оставить свои следы на каждой отдельной плите. Сложенные друг с другом плиты создали специальные пути для отложения пыли и соли, на основании которых на поверхности образовался уникальный эффект старения.
